

ABOUT US

YOUR COMPANY. HOW CAN YOU MAKE SURE YOU HAVE THE BEST? WE CAN HELP.

Our professional teams of consultants have hands-on experience working with, and for, major airlines, charter carriers, aircraft manufacturers. With each new assignment, our wealth of industry knowledge continues to evolve, and we apply this experience to each and every project we undertake, providing our clients with appropriate, high quality impartial recommendations. Our ability to put together project teams who know aviation from each of its industries' perspective, also sets us apart and positions AFMs to provide better insights and solutions.

Our consulting capabilities include, but are not limited to, strategic, financial and technical planning for airlines, determining the economic impacts of aviation, airline asset management and remarketing of aircraft and spare parts, airline operations and management, safety and security audits and expert advice, planning and facilities development and remarketing.

AirFleet Managers are experienced aviation professionals delivering aviation solutions at your doorstep.

Our specialists cover virtually every field of aviation from pre-purchase, maintenance and operations setup and to a continual effective fleet management. Pulling from the experience and know-how of aviation fleet management, we help protect your investment by ensuring that Engineering and operational needs are successfully managed in a planned and reliable way.

Develop... Manage... Monitor...
